

CCSP - Cisco Certified Security Professional

The Cisco Certified Security Professional (CCSP) certification provides network professionals with professional level recognition in designing and implementing Cisco secure networks. CCSP holders are most likely to be actively involved in developing business solutions and designing and delivering multiple levels of security for underlying network architectures. This certification validates knowledge and skills in key areas of network security including identity, firewalls, VPNs, intrusion prevention systems and security management.

What course should I take?

Prerequisite certification is the CCNA

The courses which you should take are,

- [SNRS - Securing Networks with Cisco Routers & Switches](#)
- [SNAF - Securing Networks with ASA Fundamentals](#)
- [IPS - Implementing Cisco Intrusion Prevention Systems](#)
- [MARS - Implementing Cisco Security Monitoring, Analysis and Response System](#)
- [SNAA - Securing Networks with ASA Advanced](#)

The exams which you should take are -

[SND # 642-504 - Securing Networks with Cisco Routers and Switches](#)

----- & -----

[SNAF # 642-524 - Securing Networks ASA Foundation](#)

----- & -----

[IPS # 642-533 - Implementing Cisco Intrusion Prevention Systems](#)

----- & -----

[MARS # 642-545 - Cisco Secure Virtual Private Networks](#)

----- OR -----

[SNAA # 642-515 - Securing Networks ASA Advanced](#)
